

Salomon X Ultra MID

Black / Black / Black (L47452800)

SALOMON

The XA Forces Mid is a product from the Salomon Forces line. This model is **NOT** ISO 20347 : 2012 certified.

This document serves to simplify the understanding of how the product is constructed.

Product Reference:

X ULTRA FORCES MID

Article Code:

L47452800

Color:

Black / Black / Black

Construction & Material of Outsole:

Cemented EVA Midsole / Rubber Outsole

Insert Nature:

Non Metallic / ENIGMA ZERO HT² - N. 3721067/E

Manufacturer:

Salomon SA

ZA des Croiselets

14 Chemin des Croiselets

74370 Epagny, Metz Tussy

France

Product Description:

Equally at home on low-vis operations and high-tempo assaults this boot combines the agility of a trail running shoe with the stability of a light hiker. Equipped with an Advanced Chassis providing lateral support and anti-puncture underfoot the boot is protective yet does not compromise freedom of movement.

The upper material needs to be robust and very flexible. To meet these requirements, a non-reflective material mix of anti-debris mesh, PU coated leather and single-layer mesh has been selected. The SensiFit™ system cradles the foot from the midsole to the lacing system to provide a secure, precise and almost customized fit. The inside of the boot is reinforced with an additional material to support climbing and fast rappelling.

The performance and stability of the sole construction play a crucial role in the field. In combination, the Contagrip® Chevron Lugs outsole, Advanced Chassis™ and anti-puncture Enigma Zero HT2 insert provide an optimum response to all requirements. An OrthoLite® inlay sole ensures a comfortable fit and additional damping in the boot, while perforations in the sole support a pleasant foot climate.

Technologies / Material	Description
Anti-debris Mesh	Tight mesh that prevents debris from being trapped between your foot and the footbed.
Single layer Mesh	A single layer of Mesh, close to the foot, for maximum feel.
PU Coated Leather	A polyurethane coated leather that protects it and makes it stronger to last longer.
Non-reflective materials	Built to be discrete and non-reflective for Tactical use.
Closed hooks	For tactical use, these closed hooks reduce the risk of snags from ropes, etc.
Lace Pocket	Tuck the excess lace and the buckle up inside the pocket on the tongue of the shoe.
SensiFIT™	SensiFit™ cradles the foot from the midsole to the lacing system, providing a secure, snug and virtually customized fit all around the foot.
Gusseted Tongue	The tongue is connected to the upper on both sides, preventing debris from entering the shoe, and keeping the tongue centered.
Protective Toecap	3D Toecap construction
Protective mudguard	A wrap of leather, synthetic or rubber around the base of the foot that protects the lateral and medial sides of the foot.
Advanced Chassis™	Advanced Chassis™ is a molded insert embedded in the outsole. Providing strong lateral support and reassuring protection, it also delivers optimal mobility and flexibility.
Energy Cell	A high performance EVA foam that provides shock attenuation (55C)
PFC free	To help reduce our impact on the environment, no harmful PFC are used to ensure the water repellency of our shoes. Our waterproof GORE-TEX models are free from PFCec .
ENIGMA ZERO HT2 Anti Puncture Insert	Woven, 3.9mm thickness and non-metallic A layer of puncture-resistant material added to the outsole prevents sharp objects from penetrating the bottom of the shoe.
OrthoLite® Insole	Ortholite® insoles provide step-in comfort and enhanced durability, breathability, moisture and odor control using a combination of special PU and rubber
Contagrip® Chevron lugs Outsole	Lug design with deep penetration and multi-directional grip, improving traction on soft surfaces like mud or loose dirt.
